### Project description

There are a number of various sports grounds situated on the property of the stadium. : 4 football fields (2 with artificial and 2 with natural grass), track-and-field athletics infrastructure meeting the requirements of both professional athletes and amateurs, 4 tennis courts, and 1 gym. Because of its wide range of use possibilities the “Start” stadium is often the venue for various events and concerts.

The “Start” stadium is somewhat of a pioneer in the region, because it is located in the city, which has been chosen as one of the cities for the next big football event in Russia in 2018. SKIDATA experts developed the concept for an access solution and implemented the project in July 2014. In less than two weeks the whole project was implemented and up and running. Already starting in August 2014, the venue has been successfully used for holding matches of the Russian Premier League, as well as other events.
