Akasya Shopping Center

Turkey

Akasya Shopping Center

Akasya Shopping Center – one of the biggest and best shopping malls in Istanbul, Turkey - is located in the Anatolian side of Istanbul. As it is in between the junction of the European and the Asian motorways, many visitors from different continents come here to shop in the 257 stores covering 80,000 m².

To meet the challenges of those many people arriving at Akasya Shopping Center, they need a well-functioning infrastructure of their carpark. SKIDATA assisted them with the opportunity to reach that goal.

Project description

Akasya Shopping Center was established in March 2014 and gives customers the opportunity not only to shop in a big mall with a huge selection of stores, but it also offers a wide range of activities. Guests can dine, go to the cinema and bring their children to KidZania, which was built up for educational and entertaining programs. Akasya is a long term partner of SKIDATA and therefore, trusts in the quality of its products and services. As Akasya is an A++ level shopping center, it

needs a high-quality parking management system, that SKIDATA can offer. The innovative and reliable products from SKIDATA were decisive in Akasya's choice in addition to the excellent after-sales service and third-party integrations, making it easy to partner with SKIDATA. Lastly, customers can easily enter the shopping center and validate their tickets, which makes their visit less stressful.
