keytix paper/plastic se

Through its contactless access, the disposable RFID ticket offers your guests not only a high comfort but also gives you long-term benefits. Rely on versatility, sustainability, and security while saving money at the same time.

Save money, increase flexibility

- No additional costs for barcode scanners for disposable paper tickets.
- No effort for collecting returned reusable plastic RFID cards.
- Take advantage of savings through the latest production methods and the newest technologies.
- Whether single fare or multi-day pass, SKIDATA has the right keytix for you.

Ecological business practices

- FSC® (Forest Stewardship Council) certified: The paper used comes from responsible sources.
- The tickets are free from PVC and Bisphenol A.

One card, many possibilities

- Expand your business model by loading a variety of access authorizations on a single keytix - for example, ski ticket, parking ticket, or admission ticket for a stadium.
- Create your ticket with your corporate identity and boost your income through sponsor advertising.

More security, memory, and throughput

- Increased safety due to advanced security mechanisms and a longer key.
- Additional memory makes the simultaneous use of multiple applications easier.
- Increase in throughput thanks to optimized coordination between reader and data carrier.
