Freemotion.Gate 'Basic'

Freemotion.Gate 'Basic', SKIDATA's reader for mountain resorts, plays all the tunes. Innovation and functionality boost its performance and provide a maximum of convenience, safety and prevention of ticket abuse. "Unlimited pleasure on the slopes" is the new philosophy in access management!

Put a stop to the ticket fraudsters' game

- Do you know how much money you are losing each day due to ticket abuse? Shouldn't this vexed question long be a thing of the past? Freemotion makes it one. The photo comparison function and the height sensor make sure that tickets cannot be passed on to others and adults cannot use a ticket for children.
  Why do without this?

Save money

- You can always rely on Freemotion.Gate 'Basic'. Simple and rugged – many claim it, SKIDATA proves it. Profit from the modular design to reduce maintenance work – your staff have more important things to do.
- Low-maintenance design
  Standard maintenance tasks can be carried out quickly and easily; no external support required.

Ticket check in Record Time

- Swing on the slopes – and back up in a swing Freemotion.Gate 'Basic' lives up to its name: its extremely high reading capacity substantially increases the throughput.

Cutting-edge technology and design

- The experts have voted:
  The design and functions of Freemotion have won it the first prize in the Salzburg Innovation Award.
