Plate.Gate 'Brilliant'

automatic,
quick, reliable

With Plate.Gate 'Brilliant', you take advantage of license plate recognition for efficient access management. Tomorrow's technology for comfort and safety today - for you and your customers.

Reliability and security

The infrared sensor, combined with infrared flash, provides dependable identification of license plates both day and night. State-of-the-art image processing algorithms and AI-based OCR software ensure that the vehicle is reliably identified via the license plate.

Speed and comfort

Authorization for the entrance and exit can be checked without the use of tickets. The integrated high-performance processor achieves high-speed reading whether the vehicle is moving or stationary.

Easy installation, flexible implementation

Easy integration with Plate.Tech Logic allows you to get more out of the control center for setup, control and optimization. And floor, wall, pole and ceiling mounting options make the Plate.Gate 'Brilliant' fit for any situation.

A perfect match

All SKIDATA solution components are designed for optimal coordination. Combine Plate.Gate 'Brilliant' and SKIDATA's Parking Logic together with PlateTech.Logic for the highest possible recognition rate in addition to maximum security and comfort.
