

Customer-Display

The customer display with an appealing look serves as a price and change display as well as simple customer information, e.g. welcome text or date/time. The product is an optional device for Manual.Cash (POS cash register).

Entirely According to Your Needs

Simply mount the customer display onto the display rack or onto the window glass with its suction pads. Decide individually on site.

Compatibility

The continuation of the tried and tested SKIDATA customer display model is ensured. Just exchange your old device. The character set is compatible to the previous display and applications.

Easy Handling

Only one USB port is necessary to provide the display with data and power.

Customer Comfort

The display offers a two-line, alphanumeric display with up to 20 characters per line.
