sweb[®] eTicket

Your fast lane
to convenient
e-ticketing.

Take advantage of the digital world and the use of smartphones as a data carrier. The service generates and e-mails electronic tickets. SKIDATA coordinates the integration of various wallets and ticket technologies, as well as their reliable delivery, on your behalf.

So easy, so economical, so efficient

Ticketing providers should be able to concentrate on their core business instead of having to deal with technology providers. We're happy to take care of that for you. Enjoy the smooth, cost-efficient SKIDATA integration solutions.

Convenient and standards-based

Native standard apps such as Apple Wallet and Google Pay make e-tickets as easy to use as a boarding pass. There's no need for you to negotiate separate deals with the major providers – SKIDATA will take care of that for you.

Digital access

Your interactive e-tickets are delivered straight to your smartphone so they are at your fingertips whenever you need them. Customers simply choose their preferred delivery mode: Print@Home, Apple Wallet or Google Pay.

Individual, flexible, safe

The interactive e-tickets can include additional information and Internet links and can even be updated after sending. The authentication mechanism ensures that only the buyer can download the e-ticket.
