

Validation Solutions

Grow your parking business:
Benefit from the many validation
and cross promotion possibilities

Single or multiple validation solutions

- Single validation: the ideal option for validations by a single provider.
- Multi-validation: lets customers collect accumulated discounts at multiple providers.

Full control of all claimed validations

- Built-in off-line counter on validation device
- All uses of parking validations are registered
- On-line systems generate reports for your parking system to ensure the correct application of rate discounts.

Lots of promotional options for retailers

- On-line validation or manual validations by means of thermal validation stamp
- As an alternative to using validation devices, retailers may obtain validation cards for giving out to customers.

Everyone's a winner!

- End users save money.
- Retailers provide convenient customer parking to boost profitability.
- Validations allow them to win new patrons by giving them a good reason to come and use the parking facilities.
