

Manual.Cash 'pick-up'

From the online reservation to the printed ticket

With Manual.Cash 'pick-up' you can produce tickets and vouchers 'just in time'. The practical addition for reservations from the webshop, giving you a perfect overview of the current status of orders at all times.

From the webshop to the cash register

Convert Internet reservations into fully coded and printed tickets and vouchers that are visually appealing in the design of your ski area (webshop required). Reservations do not require a keycard in this solution. Tickets are printed ad-hoc at the time of pickup.

Flexibility for everyone

Print tickets and vouchers exactly when and where they are needed. You benefit from having location-independent access to the current reservation information throughout the entire ski area, and your customers benefit from the flexibility of picking up their tickets at any one of a variety of locations.

Easy handling

Use Manual.Cash 'pick-up' at any network-connected location of your choice - of course, also in combination with the Summit.Logic POS system. Customer data and photos can be corrected at any time before printing. With just the touch of a button, you can switch between Manual.Cash 'pick-up' and the Touch.Cash at the workplace.

An overview with just one click

Browse and search centrally based on a wide variety of criteria to find reservations quickly. With its pre-defined reports, Manual.Cash 'pick-up' provides an easy-to-read presentation of data at the touch of a button for both reservations and tickets already issued.
