

Manual.Cash 'print & send'

Professional and
promotionally
effective ticketing

The name says it all: With Manual.Cash ,print & send', you can have online reservations delivered as tickets directly to your customer's mailbox in just a few steps. With little effort, targeted information can be easily packaged into professionally designed customer mailings.

And off it goes!

Convert internet reservations into fully coded and printed tickets and vouchers in the design of your ski area. Collectively processed and produced, you'll have the tickets ready for sending in no time at all.

Direct customer contact

Individually or in batch: The letter or mail service supports you with personalized cover letters and address labels. Customize the content and layout to meet your specific needs - and the effective, personalized cover letter is ready.

Additional target groups

Requiring the customer to have a keycard as a prerequisite for internet presales is a thing of the past. Enlarge your customer base by expanding your e-ticketing target group to now also include customers who do not have a data carrier (Webshop required).

Perfect support

Stacks of advantages: Thanks to batch processing, you benefit from more efficient ticket production. Browse and search for reservations centrally using a wide variety of criteria to easily check customer data. Predefined layouts provide reports that are easy to read and understand.
