

Touch.Cash

Sales with a special Touch.

Reduce the waiting time at your checkouts and simplify the sales process for your cashiers. Quick and simple service.

Intuitive operation

The straightforward cash desk user interface is intuitive and its operation is easy to learn, thereby reducing the training time. Important elements like the calendar or the sales history, for example, are embedded in the user interface.

Customizable user interface

The Touch.Cash provides for a modern and user-friendly operation. The graphical user interface is scaled automatically, and products can be arranged as you wish – to accommodate exactly how your staff prefer to work.

Optimized sales process

Cashiers can personally arrange and group their favorite products depending on their individual needs. This allows them to place the most important products in the basket with one touch, accelerating the sales process at your checkouts.

Multiple operating possibilities

The advantages of various operating possibilities combined: Depending on your preferences, the cash desk can be operated using the touch screen, or additionally using a standard keyboard, the SKIDATA USB-Keybaord, or a mouse.
