

Handshake.Logic Hosting

Advanced, secure
data hosting
with SKIDATA

Your data is in very good hands with us! Whether you operate a stadium, attraction park or leisure facility, our highly trained hosting experts take care of your Handshake.Logic solution and help to lower your costs. Host your SKIDATA solution components in our hosting center in Wels!

Focus on your core business

Free yourself from annoying, time-consuming administrative tasks. Being able to focus fully on your core activities - such as event marketing, sponsor and partner relationship management, merchandising, PR, etc. - will allow you to increase revenues.

Minimize your costs

Outsourcing your Handshake.Logic server to SKIDATA helps you reduce your overall investment in IT infrastructure. Overheads are easy to calculate, thanks to pre-defined charges. Staff expenses for IT experts and cost-intensive trainings are eliminated altogether. Lower licensing costs than for traditional on-site installation.

Cutting-edge IT infrastructures

Server rooms equipped with latest technology, high-power air conditioning and excess temperature protection, emergency ventilation, fire management system, independently powered emergency power supply (UPS and emergency power units), personalized restricted access to server room, and full video surveillance and comprehensive, round-the-clock system monitoring.

No need for dedicated IT personnel

Our qualified IT experts are highly experienced in hosting and will take care of all necessary tasks, such as: installation of appropriate server rooms, setting up redundant, fail-safe server infrastructures, regular infrastructure updates, data backups, regular reporting, upgrades of your Handshake.Logic software, and much more.
