

sweb[®] Accredit

The next generation of accreditation

Manage guests, VIPs, and media with an efficient accreditation software in combination with reliable, secure access control. No event is too large or too small when it comes to safely personalizing access in event management.

Adjust to your workflow

Easily create, approve and manage access entitlements and user privileges for all your events with easily modifiable workflows, based on the size and specific requirements of each event.

Stay in contact

From an invitation to site check-in, and the pre-event briefing to the follow-up: e-mail and/or messenger services are available for customer-oriented and personalized communication before, during and after the event. Stay in contact when it matters most.

An integrated solution

sweb Accredit is fully integrated into Handshake.Logic - the access component of the SKIDATA event solution. By centrally accessing your data, you keep a 360° oversight of your operations.

Choose your format

Automatically create electronic accreditations and high quality media passes or VIP badges in the branding requirements for your event. In addition to various technologies (like barcode and RFID), you can also choose from a wide variety of layouts.
