

skiosk® Slim 'Parking'

Elegant & efficient

The cashless digital kiosk for quick and easy payment: a stylish eye-catcher for business centers, airports, shopping malls and hotels. It serves as an all-in-one control dashboard, information and advertising panel.

Control dashboard and advertising panel in one

The large 24" touch screen is optimized for dazzle-free, intuitive user interaction. Its split-screen function allows the monitor to be used as an information display while doubling as a lucrative advertising panel. Entering license plate numbers is easy and straightforward to ensure maximum convenience when paying or validating the parking fee.

Cashless: fast – easy – secure

With the cashless digital kiosk, collecting fees is not the only thing that's quick and easy. Apart from the need to handle cash, it'll also save you the related staff resources. This helps to keep security up and running costs down.

Remote customer service

A bi-directional intercom connection in combination with intelligent device remote controls (optionally with video) makes it easy to provide customer service from remote locations. This ensures your digital presence at the skiosk Slim when it's needed, allowing you to perform required control procedures remotely to assist your customers.

Stylish design for indoor locations

With its stylish exterior, the skiosk Slim will integrate perfectly with your corporate architecture. The smart 24-inch touch screen will attract your customers' attention for maximum impact of your information and advertising messages. The result is payment made easy, with the added benefit of information, all in a relaxed atmosphere – in short, a perfect formula for customer satisfaction.
