Mobile.Gate 'Parking'

The mobile all-rounder

Ticketing, cash register functionality, validations and exit management all in a single app for your smartphone. Operate your parking garage from wherever you are – using a mobile solution for flexible parking management.

Everything under control – even without infrastructure

Temporarily expand your parking garage capacity and cost-effectively manage your parking spaces even without fixed device infrastructure. Offer your customers the perfect service in your parking facility even during times of peak activity or in the handling of problem situations. The mobile solution when space is limited and your emergency backup plan for dealing with defective equipment in entrance and exit lanes.

Your data is secure

“Online mode” means that data is stored in a central database – not on the mobile device. All transactions are processed and documented as usual within the parking system.

Select your mode of operation

Flexible use as a mobile application at the entry for the issuance of short-term parking ticket barcodes. In cash desk mode, it can be used for the scanning and payment for barcode tickets. Alternatively, the application can also be used for the distribution of electronic validations and discounts.

Intuitive operation

The simple and intuitive operation of the mobile application reduces training and getting-up-to-speed times and efforts to a bare minimum. Easy to operate – flexible in use.
