Handshake.Logic 'Server'

Flexible, Effective

The leading software for admission control at attraction parks, multi-function arenas, sport- and concert events.

Flexible

Handshake.Logic suits every size of event from the smallest attraction park to the largest sports arena. It adapts uniquely to every venue and situation. A concert today, a sporting event tomorrow. Simple configuration instead of laborious adaption.

Secure

Counterfeit tickets or adults using children's tickets are a thing of the past. That's because Handshake.Logic offers latest-generation security anywhere, any time. What's more, the ticket checking system can be installed, hosted or operated on-line, off-line or locally.

Effective

Handshake.Logic will reduce ticket misuse and therefore increase revenue permanently, bringing you a large and quick return on investment. Automated ticket checks ensure high throughput at the checkpoint and increase the security of the event, as well as enhancing the visitor experience.

Service-focused

Automated access control allows you to deploy your staff resources where they are needed most. This way, you can raise your service quality even further. SKIDATA's experience lets you profit from their extensive know-how and service to help you to achieve your goals more easily.
