

Ski Dubai

Ski Dubai is the first indoor ski resort in the Middle East located within the Mall of the Emirates. Ski Dubai offers an amazing snow setting for skiing, snowboarding and tobogganing or just playing in the snow for beginners and snow sport enthusiasts all year round.

Suitable for all ages and abilities, the facility encompasses the ideal conditions for skiing and snowboarding, with a choice of five runs, as well as a 3,000 square metre snow park with tobogganing, a twin track bobsled ride and tubing, and the opportunity to train with international ski instructors at its Snow School.

Ski Dubai

Solution for People Access:

Installation Date	September 2005
Operator	Transmontagne
System Application	Handshake.Logic
Ticket sale stations	10 based on SKIDATA ticketing software G7
Access terminals	10
Data carrier	Keycard, Barcode

In its first year Ski Dubai welcomed one million visitors to its popular snow venue. For professional access & ticketing management the operator relies on SKIDATA solutions. Ten access gates enhance fast and convenient processing of high visitor volumes to the slopes. The ticketing solution G7.Cash applied at the POS desks serves for the sales of individual ticket types and rates.

SKIDATA - Your Partner for Professional Access Management

SKIDATA is a leading provider of solutions for controlled access of persons and vehicles. SKIDATA systems are characterised by high quality and an attractive, ergonomic design. Modular, individually extensible solution platforms interface seamlessly with third-party systems to meet a wide spectrum of different client requirements. SKIDATA solutions are designed specifically to combine a minimum of required resources with a maximum of user-friendliness. As a result, they help to improve revenues and increase the profitability of our clients' businesses.

SKIDATA competence is documented by more than 5,500 installations at stadiums and arenas, exhibition centres, leisure parks, alpine resorts, car park operators, airports, cities and communities, shopping centres, hotels, universities and hospitals.
