

THEME & AMUSEMENT PARKS

SKIDATA Provides Access to Amusement

Access to amusement is playfully easy: The innovative SKIDATA people access and parking facility solutions enable smooth entry to parking areas and quick access to attractions. In this way, the visit to amusement and tourist attractions are an exciting experience right from the beginning – for operators and guests.

Whether for theme parks, water parks, zoos or other amusement havens: SKIDATA's complete solutions for efficient visitor management scores with a high level of flexibility for customer-specific customizations and open system interfaces.

The SKIDATA Solution – Targeted Visitor Management

Individuality: Our solution architects are available to you and develop an individual, future-oriented and complete solution with you.

Modularity: You can work with the exact solution that corresponds to your requirements.

Integrability: CRM, ERP, Food & Beverage, Social Media & Co: The integration of external systems and third-party applications is possible anytime.

Scalability: From the regional amusement facility to an international center of attraction. You are growing and want to offer additional services to your visitors? Your visitor management solutions grow with you.

Flexibility: Our systems support the most diverse ticket technologies such as paper ticket, touch-free data carriers (RFID), Print@Home, Mobile Ticketing and Near Field Communication (NFC). You call into action whatever you require!

Profitability: Optimize your processes, decrease your operating costs and expand your best revenue streams with SKIDATA.

Products for the Perfect Performance:
