

TRADE FAIRS & EXPOSITIONS

Measurable results with SKIDATA access management

Expo visitors who complete their program stress-free. Exhibitors who come out happy at the end. Thanks to perfect preparation, fast entry with secure turnstiles and access readers as well as easy orientation on site, you can turn various fairs and exhibitions into your personal success. SKIDATA offers holistic access control systems and visitor management for major events as well as reliable barrier systems for efficient parking space management.

Provide the success an attractive exhibitors platform!

Managing trade fairs and exposition venues requires experience, overview, solid nerves and perfect support of access control and marketing. SKIDATA's professional visitor management provides your visitors stress-free and rapid access to the trade fair and exhibition center. The data collected can be used for after-sales marketing. Of course, access management is thereby tailored to meet your specific requirements.

Modularity: All solutions are adapted to your individual requirements and can be expanded flexibly.

Flexibility: SKIDATA systems support different ticket formats and technologies such as paper tickets, contactless data carriers (RFID), Print@Home, mobile ticketing and near field communication (NFC).

Integrability: Interfaces make it easy to integrate third-party systems such as CRM, ERP, etc.

Future-proof: Our concepts and technologies are suitable for current and future requirements.
