

Al-Ahli Stadium Dubai

Dubai is setting standards in every regard. It's no wonder then that the metropolis of United Arab Emirates also has one of the most modern stadiums in the kingdom – and with Al-Ahli Dubai – an especially successful football club. The club, which was founded in 1970, and plays in the professional league and has won numerous cups and crowns even won the Double in 1975.

Naturally, the stadium of such a successful club must conform to the most modern FIFA standards. For fast and secure access, the Al-Ahli Stadium was equipped with the internationally proven handshake system from SKIDATA that reliably provides for automated control. handshake has already proven itself and is already taking over the access control in other stadiums in Saudi Arabia.

Al-Ahli Stadium Dubai

Project Details

Installation date	September 2009
Operated by	SELA Sport
POS terminals	26
Ticketing system	WWTS
Checkpoints	12
Handhelds	2
System application	handshake
Data carriers	Barcode ticket

Fans and guests of the Al-Ahli Football Club in Dubai can enter the stadium significantly easier, more comfortably and, above all, in good time. SKIDATA access controls ensure fast entry, prevent long waiting times and still are able to allow only those to enter who have a valid ticket to the game.

Twelve fixed gates and two mobile checkpoints with handhelds are available to the visitors in the Al-Ahli Stadium Dubai. At every checkpoint, the modern access system handshake from SKIDATA checks up to 1,000 tickets per hour. The stadium operators are also taking advantage of SKIDATA's Flexible.Cash with ticketing. VIPs can pass the checkpoints with RFID tickets without noticeable delay. Every ticket can also be provided with multiple entries whereby handshake reliably provides for the correct billing. The operators profit from significantly better performance with access management and security. You gain an overview and benefit from the advantages of handshake and Flexible.Cash for optimal marketing.

Special Features

- 12 Checkpoints
- 2 mobile checkpoints with handhelds
- Flexible.Cash Ticketing
- VIP RFID Tickets
- Multiple entries bookable on one ticket
- Gates are equipped with escape mechanisms
- Entire project managed by SKIDATA

handshake

As leading provider of access systems, SKIDATA offers with handshake a user-friendly, multi-application software platform. The open interface concept makes handshake ideal for stadiums and amusement parks, as it adapts equally well to new facilities and existing building structures.
