

Józef-Piłsudski Stadium

(Cracow, Poland)

Józef-Piłsudski Stadium in Cracow, Poland's second largest city with 750,000 inhabitants, was constructed between 1911 and 1912. It is the home of KS Cracovia, Poland's oldest football club. Founded in 1906, KS Cracovia was one of the first Polish football clubs and is the oldest existing club established in the contemporary Polish state. The club's nickname "Pasy" means stripes and refers to the uniform's red and white stripes. Cracovia plays currently in the first division of Polish football, the so-called Ekstraklasa, and has been the Polish champions five times in its history.

Józef-Piłsudski Stadium

[Cracow, Poland]

Solution for people access:

Installation date	2010
Operator	Cracovia Football Club
Points of sale	10 terminals
Accreditation	WWTS
Gates	34 and 2 VIP systems
Software	Handshake.Logic
Data media	Barcode, RFID tickets
Fan identification	Integoo

In 2009, extensive renovations were made and Józef-Piłsudski Stadium was rebuilt entirely. It now has a roof and has earned three stars from UEFA, which makes it eligible for national team matches and other important games, including European Cup matches. Józef-Piłsudski Stadium, named after a Polish general and politician, has a capacity of 15,114 spectators.

The second largest club in Cracow has decided on SKIDATA: A total of 36 gates were provided (Vario.Gate and Arena.Gate systems) along with Handshake.Logic technology. In addition, as system integrator, SKIDATA sold the accreditation system. It will be the first stadium in Poland to install WWTS ticketing and fan identification technology, in order to meet the requirements of the "Karta Kibica" fan card. SKIDATA also fully integrated the fan identification system from the technology provider Integoo. The installation itself was carried out by DG Park, SKIDATA's Polish partner, together with Comarch. The first match was held on September 13, 2010.

Special features

- SKIDATA provided access and software, as well as integrating the accreditation system according to Polish guidelines for fan identification.
- Partnered with multiple local providers for project, installation carried out by SKIDATA's Polish partner, DG Park.
