

OFFICE PARKING

Convenient Parking at Work

One parking facility, several companies. Entry and exit driveways of office and business parks are used by many employees, regulars and guests every single day. For this, automated handling and occupancy rate transparency is required. The challenge hereby is in the management of users that park regularly. SKIDATA web-based tools take care of that for you. As an operator, you assign parking facility contingents to resident companies. These, on the other hand manage their employees and regulars themselves. Sounds complicated, but it is really simple – thanks to SKIDATA services. The solution also provides for day-visitors. In short: The service package includes the management of long-term as well as short-term parkers.

Your Benefits

User-friendly Operation

- Easy self-service for business customers with long-term parkers such as employees and regulars
- Parking space contingents are in your hands: As the operator, you allocate as many permissions to your business customers as you like
- Supports various hands-free access media (e.g. SKIDATA keycards, Mifare data storage devices, long-range keytags)
- Day-visitors take a ticket at the entry and conveniently pay at the automated payment machine. Alternatively, they can receive a free exit ticket from the company they are visiting.

Resource-efficient Operation

- Automated invoicing of your business customers and billing for active parking tickets
- Simple handling of guests/day-visitors through payment at automated payment machines or handing out pre-issued exit tickets
- No local IT infrastructure needed – thanks to hosting of the solution at the SKIDATA data center

Additional Sales Channels

- Optional extension of the solution with SKIDATA's reservation and booking portal for one-time visitors, such as daily visitors

Your Business at a Glance

- Transparent occupancy rate and user behavior – simple and at the touch of a button
- Operative monitoring of all devices – always and everywhere

Cost Efficiency

- Inexpensive ongoing fees for the SKIDATA solution and the B2B long-term parking application
- Low, one-time capital expenditure for hardware (e.g. for long-range readers)

More Security

- Personalized access permissions for high security standards
- Easy deletion or blocking of permits on leaving a company or after card loss
- Controlled access of day visitors to the parking areas

Supporting versatile hardware components (examples) - by taking existing infrastructure into consideration.
