Parking Operators

England

CitiPark

Leeds is a vibrant city – it offers excellent conditions for a growing and innovative economy. And, it has a great quality of life. Right at the gates of the city center, there is a car park that perfectly fits the needs of modern mobility. With the First Direct Arena and the Merrion Shopping Centre just a stone's throw away, the requirements for a flexible and up-to-date car park are at a high level.

The operator, CitiPark, originally based in Leeds but with a rapidly growing business all over England is one of the leading car park operators in the UK. As a provider for their car park access solution, CitiPark chose SKIDATA.

CitiPark

Parking Operators

England

Project description

To cater to the needs of a modern and smart mobility, the 1,000-space car park offers features such as electronic license plate recognition, an electronic guidance system, and a charging station for electric vehicles. To make customers' lives easier, the payment of the electric charging service is directly integrated into the payment of the parking service.

And even more: To find a safe parking space also on busy days or before concerts, visitors can reserve their parking in advance. Afterwards, they receive their reservation confirmation including an entry barcode via e-mail. Customers can either save this on their smartphones or print it at home and comfortably enter the car park. Services like these make a CitiPark car park ready for the mobility of the future.
