

TOURIST DESTINATIONS

Connect Access Control Management and Parking Systems

Different service providers in one region generally use their own access control management systems, requiring separate investment and work. Why not enter into cooperative ventures that reduce costs and increase profits? Hotel keepers, local transit systems, recreational facilities, ski and bicycle rental shops and many other enterprises are a perfect complement to each other in the tourism business. Market all regional services jointly and make them available via a single guest pass. Customers will thank you by becoming regulars.

Your SKIDATA Solution - Targeted Destination Management

Planning: In this phase the visitor explores available options and compares different offerings.

Booking: Our solutions support numerous sales and purchase options.

Anticipation: This phase lies between the purchase and arrival at your vacation destination.

Experience: The experience phase starts with guest arrival at his vacation spot. Our solutions allow your guest to enjoy all services conveniently with just one card.

Reminder: By recalling the visit, your guests can share their experiences at your facility with their friends – good advertising without additional cost.

Your SKIDATA Solution - Targeted Destination Management

Operators	Service providers	Guests
Increase attractiveness	Common platform	Easy purchasing
