

Resort Management Skistar-Experium (Sweden)

Skiing and Relaxing with SKIDATA. If you want to relax after a day of skiing or some other outdoor activity, then Experium is the right place to go. In Sweden's Ski Resort Lindvallen (Sälen) a new and unique Day Spa and activities center, has opened. The centre offers a large indoor water park, a sauna world, 3D cinema, restaurants and shops. Everything, from the building itself to the activities inside will be a unique experience.

Resort Management

Skistar-Experium (Sweden)

Project-information

Installation Date	December 2009
Operator	Skistar
Number of POS	40
POS Software	RTP ONE
Access Software	RTP ONE
Access	2 Vario.Gates
Data carrier	KeyWristBand (wristband with RFID, multi-layer)
Interfaces	Metra Lockers
Project Management	SKIDATA and RTP ONE

Of course SKIDATA and RTP are part of the team:

SKIDATA's new Vario.Gate provides the access. RTP integrated the SKIDATA hardware thru standardized interfaces and manages all 40 Point of Sales inside Experium. There is one datacarrier for all services: including entrance for spa and sauna world, Food & Beverage, Bowling, cloakroom and so on. When purchasing the ticket, guests get a wristband. They use it to enter the different areas of the spa and as medium of payment in the entire Experium as well. Cashless payment provides comfort to the guests purchasing food & beverage etc.

Special Features:

- Resort Management Solution by SKIDATA and RTP: Experium is one more example for SKIDATA's and RTP's successful partnership in point of Resort Management Solutions.
- Reusable RFID data carrier: A wristband is the most comfortable way to issue guests a ticket. It allows contactless access through the turnstile and serves as key to the lockers.
- Flexible rates: Owners of skiing passes and daily spa visitors need to be differentiated upon entry.
- Cashless payment: The KeyWristBand is accepted as a cashless form of payment throughout the spa.
