

Mobile.Gate 'Handshake'

Ticket check in motion

The Mobile.Gate 'Handshake' is the next generation of mobile ticket check. Based on the Android platform SKIDATA offers a mobile application for scanning barcode, RFID and NFC data carriers.

Support instead of examination

Increase customer satisfaction and welcome them personally. Don't let your customers just pass the turnstiles, offer them support right at the entry.

Greater flexibility and economy

You can flexibly and economically cover peak loads and special areas using the Mobile.Gate 'Handshake'. It just takes two clicks to change the direction or location.

Increase security

By usage of the Mobile.Gate 'Handshake' additional ID and security checks can be easily handled. This also improves ticket fraud prevention.

Intuitive operation

Easy handling of mobile application should almost eliminate training and learning efforts of stewards. Just a few clicks are necessary to configure and operate the device.
