

sweb[®] Report

Reports – clear and to the point

sweb Report is the central reporting solution for all your car parks. With sweb Report you can manage and optimize your business by consolidating your data from several car parks into informative and graphical reports.

Everything at a glance

Compare the key figures of all your facilities in a ready-consolidated report. The manual consolidation of data from different facilities is no longer necessary.

Well informed - always and everywhere

Overall reports covering multiple car parks put the information you need at your fingertips – whenever and wherever you need them. All it takes is an internet connection – no need for extra software.

Clear and easy to understand

Clear graphics provide a quick overview of current operations. You can view key performance indicators and determine which of your products have the best sales figures and which car parks are the most profitable.

Easy to customize

Easily individualize your reports: The reporting package contains all the important reporting tools. You decide what format and graphics on which reports are needed for your business.
