Touchfree Ticket Sensor

Touchfree ticket
issuing

SKIDATA's touchfree ticket sensor for entry gates enhances the customer experience by avoiding physical interaction with the equipment when generating a ticket.

Touchfree environment

In combination with touchfree payment options such as sweb Mobile Pay, you turn your parking into completely touchfree – instantly. With SKIDATA solutions you benefit from a thought-out and integrated system, from one single source.

A simple gesture

Simply by raising one's hand in front of the entrance columns, your customers enter with the Touchfree Ticket Sensor Solution by SKIDATA. It can be easily and instantly integrated into your existing parking system.

Works everywhere

Utilizing radar technology, the Touchfree Ticket Sensor works in any environment; no additional maintenance needed. In addition, you maintain your equipment certifications and industry ratings.

Future-proof Solution

The Touchfree Ticket Sensor solution can be used in combination with your existing access methods such as QR codes, reservations, keycards, credit card in/out etc., for the ultimate system now, and in the future. Thus, you are well equipped and future-ready.
